Eunok Paek, Ph. D.
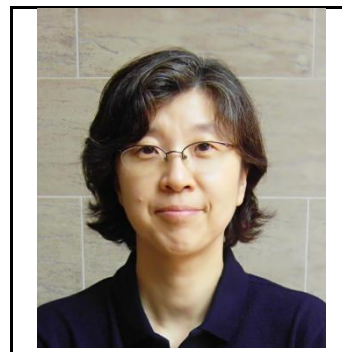

Professor
Department of Computer Science and Engineering
Hanyang University
Office: +82-2-2220-2377
E-mail: eunokpaek@hanyang.ac.kr
Homepage: http://bislab.hanyang.ac.kr

Education

1985.09-1991.06	Ph. D.	Stanford University
1981.03-1985.02	B. Eng	Seoul National University

Professional Experience

2012.03 – present	professor	Hanyang University
2008.06 – 2009.02	visiting researcher	University of California, San Diego
2006.12 – 2007.08	advisor	SK telecommunications
2001.09 – 2012.02	professor	University of Seoul
1996.06 – 2000.07	senior researcher	LG Corporate Institute of Technology

Academic Society

1992.05 - present	council member	The Korean Inst. of Information Scientists and Engineers

Publications

Hyunwoo Kim, Heejin Park*, and Eunok Paek*. (2015) NextSearch: A Search Engine for Mass Spectrometry Data against a Compact Nucleotide Exon Graph *Journal of Proteome Research*,14(7), 2784-2791

Seungjin Na and Eunok Paek* (2015) Software Eyes for Protein Post-translational Modifications. *Mass Spectrometry Reviews*, 34(2), 133-147

Heejin Park, Junwoo Bae, Hyunwoo Kim, Sangok Kim, Hokeun Kim, Dong-Gi Mun, Yoonsung Joh, Wonyeop Lee, Sehyun Chae, Sanghyuk Lee, HarkKyun Kim, Daehee Hwang, Sang-Won Lee and Eunok Paek*. (2014) A compact variant-rich customized sequence database and a fast and sensitive database search for efficient proteogenomic analyses *PROTEOMICS.*, 14(23-24), 2742-2749

Honglan Li, Kyu-Baek Hwang, Dong-Gi Mun, Hokeun Kim, Hangyeore Lee, Sang-Won Lee, and Eunok Paek*.(2014) Estimating Influence of Cofragmentation on Peptide Quantification and Identification in iTRAQ Experiments by Simulating Multiplexed Spectra. *Journal of Proteome Research*,13(7), 3488-97

Seungjin Na, Nuno Bandeira, Eunok Paek*. (2012) Fast multi-blind modification search through tandem mass spectrometry. *Molecular and Cellular Proteomics*, **11**, M111.010199

Revati Wani, Jiang Qian, Erika Bechtold, S. Bruce King, Leslie Poole, Eunok Paek, Allen W. Tsang, Christina M. Furdui*. (2011) Isoform-specific regulation of Akt1 and Akt2 by PDGF-induced reactive oxygen species. *Proceedings of the National Academy of Sciences*, **108**, 10550-10555

Jaeho Jeong, Yongsik Jung, Seungjin Na, Jihye Jeong, Eunsun Lee, Mi-Sun Kim, Sun Choi, Dong-Hae Shin, Eunok Paek, Hee-Yoon Lee*, and Kong-Joo Lee*. (2011) Novel oxidative modifications in redox-active cysteine residues. *Molecular and Cellular Proteomics*, **10**, M110.000513

Katleen Denoncin, Didier Vertommen, Eunok Paek, Jean-Francois Collet*. (2010) The protein disulfide isomerase DsbC cooperates with SurA and DsbA in the assembly of the essential b-barrel protein LptD, *Journal of Biological Chemistry* 285, 29425-29433

Seonhwa Choi, Jaeho Jeong, Seungjin Na, Hyo Sun Lee, Hwa-Young Kim, Kong-Joo Lee, Eunok Paek*. (2010) New Algorithm for the Identification of Intact Disulfide Linkages Based on Fragmentation Characteristics in Tandem Mass Spectra, *Journal of Proteome Research,* 9, 626-635.

Seungjin Na and Eunok Paek*. (2009) Prediction of Novel Modifications by Unrestrictive Search of Tandem Mass Spectra, *Journal of Proteome Research,* 8, 4418-4427.

Seungjin Na, Jaeho Jeong, Heejin Park, Kong-Joo Lee, and Eunok Paek*. (2008) Unrestrictive identification of multiple post-translational modifications from tandem mass spectrometry using an error-tolerant algorithm based on an extended sequence tag approach. *Molecular & Cellular Proteomics*, 7, 2452-2463.

Kunsoo Park*, Joo Young Yoon, Sunho Lee, Eunok Paek*, Heejin Park, Hee-Jung Jung, and Sang-Won Lee. (2008) Isotopic peak intensity ratio based algorithm for fast and accurate determination of isotopic clusters and monoisotopic masses of polypeptides from high resolution mass spectrometric data. *Analytical Chemistry*, 80, 7294-7303.

Jawon Seo, Jaeho Jeong, Young Mi Kim, Narae Hwang, and Eunok Paek, Kong-Joo Lee*. (2008) A strategy for comprehensive identification of post-translational modifications in cellular proteins, including low abundant modifications: application to glyceraldehyde-3-phosphate dehydrogenase. *Journal of Proteome Research*, 7, 587-602.
